University of Lahore

2011
Bachelors in Commerce
Elite College of Commerce

Language

English (Fluent)

Urdu (Native)

Arabic (Basic Communication)

TALHA JAMIL

Fullstack Developer

Results-driven Fullstack Developer specializing in Next.js, React.js, TypeScript, and Tailwind CSS for building scalable and high-performance web applications. Experienced in backend development using Node.js, Express, Supabase, and PostgreSQL with Prisma ORM. Skilled in designing responsive user interfaces, optimizing application performance, and integrating RESTful APIs. Strong foundation in system security, infrastructure management, and reliable deployments from prior experience in IT Administration. Passionate about delivering user-focused digital solutions, collaborating in agile environments, and driving projects from concept to production.

Projects

1. Technyon

- Developed a responsive product portfolio platform for Technyon (UK Client) to showcase tech products.

2. Point of Sale System (POS)

- Developed a POS web system with inventory, sales, and customer management modules.
- Integrated real-time data updates and secure role-based authentication.

3. Human Resource Management System (HRMS)

- Created a web-based HRMS for employee data, attendance, and payroll automation.
- Implemented analytics dashboards and automated reporting using REST APIs.

4. ResumeVerse – AI-Powered Resume Builder

- Developed an intelligent resume-building platform that enables users to create professional resumes through customizable templates.
- Integrated AI-powered content suggestions, resume optimization, and ATS-friendly formatting recommendations.

5. SpendVerse – Expense Tracker

- Cross-platform mobile app for managing personal and team expenses with real-time synchronization and offline mode.
- Built real-time synchronization, offline support, secure authentication, and role-based permissions.

6. RabtaVerse – Real-Time Chat

- Developed a modern messaging and collaboration platform with real-time communication capabilities.
- Implemented private messaging, group chats, file sharing, notifications, and online presence tracking.

Experience

- **2018 - Present**
Integrated Contracting Co. | Riyadh, Kingdom of Saudi Arabia
Fullstack Developer / IT Administration
 - Designed, developed, and deployed internal web applications using Next.js, React, TypeScript, and Tailwind CSS, enhancing workflow efficiency and automation.
 - Built and integrated Node.js/Express APIs with Supabase and PostgreSQL using Prisma ORM for secure data management and scalable backend operations.
 - Implemented authentication, authorization, and real-time features with Supabase, improving internal application usability and security.
 - Optimized UI performance, ensured cross-browser responsiveness, and deployed projects on Vercel and Supabase Hosting.
 - Collaborated with cross-functional teams in agile sprints to gather requirements, plan releases, and deliver production-ready features.
 - Additionally maintained IT infrastructure and network systems (Active Directory, LAN/WAN, CCTV, VoIP), ensuring reliable connectivity and secure user access.
- **2017 - 2018**
Morganti(RAC - KKIA) | Riyadh, Kingdom of Saudi Arabia
System Support
 - Provided IT support and system maintenance for enterprise hardware, software, and network operations across facility systems.
 - Assisted in troubleshooting and resolving performance issues, ensuring uninterrupted business operations.
 - Supported user access management, backups, and system configurations in coordination with senior IT staff.
- **2016 - 2017**
Dar Al Arkan(AI Qasr Mall) | Riyadh, Kingdom of Saudi Arabia
IT Support
 - Delivered help-desk and technical support for networked systems, printers, and workstations.
 - Assisted in installation and configuration of software and hardware components.
 - Monitored system health and performed preventive maintenance to reduce downtime.
